

MARYLAND CITIZENS' HEALTH INITIATIVE

Healthy Maryland Initiative

BECAUSE: Over the past decade, Maryland's smoking rate has declined by 32%, double the national average, saving over 70,000 people from preventable tobacco caused deaths and hundreds of millions of dollars in health care costs, in large part as a result of three tobacco tax increases; and,

BECAUSE: Tobacco still kills tens of thousands of Marylanders, costing us hundreds of millions of dollars in health care costs; and,

BECAUSE: Use of cigars and smokeless tobacco products, especially by children and teens, has increased during the last decade; and,

BECAUSE: While Maryland has made significant progress in expanding health care in recent years, hundreds of thousands of Marylanders remain uninsured or underinsured. In addition, the significant savings that could be achieved through community based initiatives have not been realized due to lack of implementation funding; and,

BECAUSE: Maryland needs to move forward in developing community based options, strengthening its safety net and improving service delivery in order to fully utilize the opportunities presented by the State Health Improvement Process and federal health care reform; and,

BECAUSE: Lack of additional funding for health care coverage, public health initiatives and community services will mean that uninsured and underinsured people will continue to go to the hospital for care which results in higher insurance premiums for everyone; and

BECAUSE: Raising the state's tobacco tax by \$1.00 per pack for cigarettes with a comparable increase for other tobacco products will raise necessary funds in addition to dramatically reducing teen and adult tobacco use, which in turn saves lives and state health care costs; and,

THEREFORE, BE IT RESOLVED: That the undersigned organization supports increasing the state cigarette tax by \$1 per pack, along with a similar increase to the tax on other tobacco products, with the revenue from these tax increases to fund: the state tobacco control program; the state health improvement process and other community based health initiatives including those that address childhood obesity, long term care for seniors; and, improved access to health care services for Maryland families.
